

PROCEDURE PROTOCOLS

Main, mandatory steps

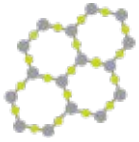

Additional, individual steps

Derma Series procedure protocols have clear and understandable structure. Four mandatory steps guarantee the achievement of the declared result. And four additional steps, you can add based on your individual judgement. However, each of them greatly increases the effectiveness of the procedure. It also helps you to adjust the cost and the duration of the treatment.

SEBOREGULATION

SEBOREGULATING CARE FOR OILY PROBLEM SKIN WITH DEEP PORE CLEANSING

Complex care (includes comedones extraction) that restores skin sebum balance and eliminates external manifestation of sebaceous glands hypersecretion (oily shine, enlarged pores, hyperkeratosis).

Maximum duration of the 8-step procedure with deep pore cleansing:
1 hour and 40 minutes

Mandatory step of the 4-step procedure

Additional step of the 8-step procedure

INDICATIONS:

- Increased sebum activity
- Numerous comedones
- Inflammatory elements
- Oily shine
- Enlarged pores
- Hyperkeratosis

CONTRAINDICATIONS:

- Acne at active stage

- CLEANSING**
Clean face and neck area with **P171 ULTRA-NORM CLEANSING GEL**. Distribute over the skin with light massage movements, then wash off. For toning use **P175 ULTRA-NORM REFRESHING TONIC**.
- EXFOLIATION**
Apply 4 ml of **P200 SOFT-PEELNIG ENZYME MASK** in a dense layer to the face and neck area. Leave it for 10 minutes. Rinse thoroughly with warm water. Tonify the skin.
- DEEP PORE CLEANSING**
Apply 6 ml of **P100 DEEP CLEANSING JELLY-MASK** under a film and leave for 10 minutes. Afterwards remove the film in segments and the rest of the mask with a dry sponge. Deep pore cleansing can be made mechanically or with a special equipment.
- SERUM**
Apply 2 ml of **P176 TOTAL OIL-CONTROL SERUM** gently to the face and neck area. Leave it for 2-3 minutes until completely absorbed.
On the inflammatory elements apply **P213 LOCAL SOS-SOLUTION**. Shake before using! The effect can be intensified by using of darsonval.
- ACTIVE MASK**
To tighten pores and for additional antiseptic & calming effect apply 6 ml of **P212 SEBO-NORM MASK** in a dense layer. Leave it for 10-15 minutes. Remove the remains of the mask with a wet napkin. Tonify the skin.
- BIOMIMETIC SERUM WITH TARGETED ACTION**
Choose one of the biomimetic serums or one of the conductive serums as indicated. Apply to the face and neck area. Leave it for 2-3 minutes until completely absorbed.
- EYE CARE**
Apply **P204 MATRIX EYE CREAM** to the eye area.
- FINISH CREAM**
Apply **P221 LIPID BALANCING LIGHT CREAM** gently to the face and neck area.
In case of postinflammatory or posttraumatic hyperpigmentation choose **P111 4-SYNERGY BRIGHTENING CREAM** azelaic acid 10%

ANTI-AGE LIFT CARE

LIFTING ANTI-AGE CARE

WITH INDIVIDUAL CORRECTION OF AGE-RELATED MANIFESTATIONS

The most popular anti-age lifting treatment today! Effective stimulation of the dermis and its components, as well as activation and maintenance of all regenerative processes in the skin.

Maximum duration of the 8-step procedure: 1 hour

Mandatory step of the 4-step procedure

Additional step of the 8-step procedure

INDICATIONS:

- Strongly marked tissues ptosis
- Swelling
- Skin sagging

CONTRAINDICATIONS:

- High sensitivity to temperature fluctuation

1

CLEANSING

Clean the face and neck area with **P172** COMFORT CLEANSING MOUSSE. Distribute over the skin with light massage movements. Wash off with warm water. Then use **P174** CALMING TONIC.

2

EXFOLIATION

Apply 4 ml of **P200** SOFT-PEELNIG ENZYME MASK in a dense layer to the face and neck area. Leave it for 5-7 minutes. Dissolve with light massage movements and then rinse thoroughly with water. Tonicify the skin.

3

MASSAGE

Massage using **P102** SILVERY MASSAGE GEL. Texture of the gel allows a massage lasting up to 40 minutes. Remove the remains with a wet napkin. Tonicify the skin.

4

SERUM

Apply 2 ml of **P185** 3D-LIFT SERUM to the face and neck area. Leave it for 2-3 minutes until completely absorbed.

5

ACTIVE MASK

Prepare **P131** POLYPEPTIDE ALGAE MASK: mix 30 g of powder and 90 ml of warm water (45°C) to create a homogeneous mixture. You can vectorize the mask polymerization and intensify lifting with gauze bandage. Apply the mask with a spatula to the face area, if needed you can also cover eye and mouth areas. Leave the mask for 20-30 minutes. Remove it as one piece. Then remove the remains of the mask with a wet napkin. Tonicify the skin.

6

BIOMIMETIC SERUM WITH TARGETED ACTION

Choose one of the biomimetic serums or one of the conductive serums as indicated. Apply to the face and neck area. Leave it for 2-3 minutes until completely absorbed. Of your choice:

P219 VITA-ACTIVE PEPTIDE SERUM

M126 CONDUCTIVE LIFT-BOOSTER

P105 LUXE-AGE GOLD FILL SERUM

M127 CONDUCTIVE AQUA-BOOSTER

P117 ANTI-WRINKLE SERUM

M128 CONDUCTIVE CALM-BOOSTER

P178 ANTI-RED CALMING SERUM

P116 BRIGHTENING ALPAFLOR SERUM

P223 HPR SERUM

7

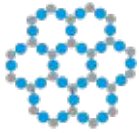

EYE CARE

Apply **P204** MATRIX EYE CREAM to the eye area.

8

FINISH CREAM

Apply **P194** RENEW LIFTING CREAM gently to the face and neck area.

BIOREVITALIZATION & MOISTURIZING

MOISTURIZING BIOREVITALIZING CARE WITH A MIO RELAX EFFECT

This care provides intensive skin hydration, smoothes wrinkles, promotes natural skin hydro-reserve ability, protection and comfort.

Maximum duration of the 8-step procedure: 50 min

Mandatory step of the 4-step procedure

Additional step of the 8-step procedure

INDICATIONS:

- Skin dehydration
- Preparation for biorevitalization or prolongation of its effect
- First signs of aging
- Fine lines and wrinkles

CONTRAINDICATIONS:

- Acne at active stage

1

CLEANSING

Clean the face and neck area with **P172 COMFORT CLEANSING MOUSSE**. Distribute over the skin with light massage movements. Wash off with warm water. Then use **P174 CALMING TONIC**.

2

EXFOLIATION

Apply 4 ml of **P200 SOFT-PEELNIG ENZYME MASK** in a dense layer to the face and neck area. Leave it for 5-7 minutes. Dissolve with light massage movements and then rinse thoroughly with water. Tonify the skin.

3

MASSAGE

Massage using **P102 SILVERY MASSAGE GEL**. Texture of the gel allows a massage lasting up to 40 minutes. Remove the remains with a wet napkin. Tonify the skin.

4

SERUM

Apply 2 ml of **P117 ANTI-WRINKLE SERUM** gently over the face and neck area. Leave it for 2-3 minutes until completely absorbed

5

ACTIVE MASK

Prepare **P208 ANTI-WRINKLE MASK**: mix 30 g of powder and 90 ml of water to create a homogeneous mixture. Apply the mask with a spatula to the whole face area (including eye area) and leave the mask for 20 minutes. Remove it as one piece. Tonify the skin.

It is recommended to apply **P135 HYDRA-HELP MASK** as a screen under the alginate mask.

6

BIOMIMETIC SERUM WITH TARGETED ACTION

Choose one of the biomimetic serums or one of the conductive serums as indicated. Apply to the face and neck area. Leave it for 2-3 minutes until completely absorbed. Of your choice:

P219 VITA-ACTIVE PEPTIDE SERUM

M126 CONDUCTIVE LIFT-BOOSTER

P185 3D-LIFT SERUM

M127 CONDUCTIVE AQUA-BOOSTER

P178 ANTI-RED CALMING SERUM

M128 CONDUCTIVE CALM-BOOSTER

P105 LUXE-AGE GOLD FILL SERUM

P116 BRIGHTENING ALPAFLOR SERUM

P223 HPR SERUM

7

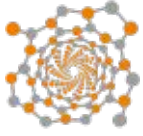

EYE CARE

Apply **P204 MATRIX EYE CREAM** to the eye area.

8

FINISH CREAM

Apply **P190 CALMING LIGHT CREAM** gently to the face and neck area.

RECOVERY & NUTRITION

NOURISHING CARE WITH A CORNEOTHERAPY EFFECT

This comprehensive care restores the skin's lipid barrier, prevents moisture loss, vitaminizes the skin and fills it with essential polyunsaturated fatty acids.

Maximum duration of the 8-step procedure: 1 hour

Mandatory step of the 4-step procedure

Additional step of the 8-step procedure

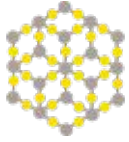

INDICATIONS:

- Thinning skin
- Loss of tone
- Dry skin
- Prophylactics during autumn-winter period for all skin types

CONTRAINDICATIONS:

- Acne at active stage

- 1 CLEANSING**
Clean the face and neck area with **P173 CALMING MILK**. Distribute over the skin with light massage movements. Wash off with warm water. Then use **P174 CALMING TONIC**.
- 2 EXFOLIATION**
Apply 4 ml of **P200 SOFT-PEELNIG ENZYME MASK** in a dense layer to the face and neck area. Leave it for 5-7 minutes. Dissolve with light massage movements and then rinse thoroughly with water. Tonify the skin.
- 3 MASSAGE**
Massage using **P102 SILVERY MASSAGE GEL**. Texture of the gel allows a massage lasting up to 40 minutes. Remove the remains with a wet napkin. Tonify the skin.
- 4 SERUM**
Apply 2 ml of **P219 VITA-ACTIVE PEPTIDE SERUM** gently over the face and neck area. Leave it for 2-3 minutes until completely absorbed.
- 5 ACTIVE MASK**
Apply a thick layer of 10 ml of **P189 SOFT BALANCE CLAY Mask**, a nourishing balancing mask with brightening and softening effect. It provides a nourishing and restorative effect for all skin types. Exposure time is 10-15 minutes, then wash it off with warm water and tone the skin.
- 6 BIOMIMETIC SERUM WITH TARGETED ACTION**
Choose one of the biomimetic serums or one of the conductive serums as indicated. Apply to the face and neck area. Leave it for 2-3 minutes until completely absorbed. Of your choice:
P185 3D-LIFT SERUM **M126 CONDUCTIVE LIFT-BOOSTER**
P117 ANT-WRINKLE SERUM **M127 CONDUCTIVE AQUA-BOOSTER**
P178 ANTI-RED CALMING SERUM **M128 CONDUCTIVE CALM-BOOSTER**
P105 LUXE-AGE GOLD FILL SERUM
P116 BRIGHTENING ALPAFLOR SERUM
P223 HPR SERUM
- 7 EYE CARE**
Apply **P204 MATRIX EYE CREAM** to the eye area.
- 8 ЗАВЕРШАЛЬНИЙ КРЕМ**
Apply **P194 RENEW LIFTING CREAM** gently to the face and neck area.

BRIGHTENING

BRIGHTENING REGENERATING CARE FOR THE CORRECTION OF PIGMENTATION OF VARIOUS GENESIS

The brightening regenerating care strengthens the skin barrier, restores the balance of fatty acids, protecting the skin from the environment. It evens out skin tone, addresses existing pigmentation, controls melanogenesis, and prevents the appearance of new pigment spots.

Maximum duration of the 8-step procedure: 1 hour

Mandatory step of the 4-step procedure

Additional step of the 8-step procedure

INDICATIONS:

- Uneven relief and skin tone
- Pigmentation of various genesis (including post-acne)
- Signs of dehydration
- Hyperkeratosis

CONTRAINDICATIONS:

- Acne at active stage

- 1 CLEANSING**
Cleanse the skin of the face and the neck with **P173 CALMING MILK**. Distribute over the skin with light massage movements. Wash off with warm water. For toning, use **P174 CALMING TONIC**.
If the skin is prone to oiliness, use **P171 ULTRA-NORM CLEANSING GEL** and **P175 ULTRA-NORM REFRESHING TONIC**
- 2 EXFOLIATION**
Apply 4 ml of **P200 SOFT-PEELNIG ENZYME MASK** in a dense layer to the face and neck area. Leave it for 5-7 minutes. Dissolve with light massage movements and then rinse thoroughly with water. Tonify the skin.
- 3 MASSAGE**
Massage using **P102 SILVERY MASSAGE GEL**. Texture of the gel allows a massage lasting up to 40 minutes. Remove the remains with a wet napkin. Tonify the skin.
- 4 SERUM**
Apply 2 ml of **P116 BRIGHTENING ALPAFLOR SERUM**, which contains a complex of alpine herbs, lecithin and hyaluronic acid, to the entire surface of the face. Distribute it along the massage lines and leave for 2-3 minutes until complete absorption.
- 5 ACTIVE MASK**
Apply a thick layer of 10 ml of **P189 SOFT BALANCE CLAY MASK**, a nourishing balancing mask with brightening and softening effect. It provides a nourishing and restorative effect for all skin types. Exposure time is 10-15 minutes, then wash it off with warm water and tone the skin.
- 6 SERUM WITH TARGETED ACTION**
P223 HPR SERUM with Grandactive Retinoid 2% – Regenerating serum with retinol.
If there are contraindications to retinol – **P107 RENEWING ENZYME AHA SERUM** – Enzyme regenerating serum with AHA acids.
In severe situations, if hyperpigmentation exists for more than six months, we can prescribe the simultaneous use of these two serums – to maintain tissue hydration, renewal and regeneration.
- 7 EYE CARE**
Apply **P204 MATRIX EYE CREAM** to the eye area.
- 8 FINISH CREAM**
Choose according to indications:
 - **P114 REVIT AHA CREAM** – Reactivating vitaminized cream with glycolic acid 15% – for the correction of hyperpigmentation and age-related changes caused by hormonal disorders or any other origins. This is a very bioavailable product that will work with deep hyperpigmentation, additionally it will strengthen blood vessels.
 - **P111 4-SYNERGY BRIGHTENING CREAM** – Brightening light cream with azelaic acid 10% – for oily skin. For correction of post-inflammatory and post-traumatic hyperpigmentation, and normalization of sebaceous glands.

PEEL-EXPERT

EXPERT PEEL CARE

General recommendations:

- Prepare the skin with pre-peeling care
- Exposure time of the peel in the first procedure - no more than 3 minutes
- In next procedures increase the exposure time gradually - up to 7 minutes maximum
- Control the peel intensity: for gel peelings - with exposure time, for liquid peelings - with the number of layers applied

INDICATIONS:

- Aging skin
- Photodamage, hyperpigmentation, dyschromia
- Oily skin, acne
- Couperose, rosacea

CONTRAINDICATIONS:

- Pregnancy, lactation

Duration of the procedure: 30-40 minutes

1	<p>CLEANSING</p> <p>Clean the skin with P171 ULTRA-NORM CLEANSING GEL. Then degrease the skin and lower the pH with M303 PRE-PEEL LOTION AHA&BHA for deeper and more even acid penetration.</p> <p>For reactive and sensitive skin, we recommend just toning the skin with P174 CALMING TONIC</p>
2	<p>PEEL APPLICATION (AS PRESCRIBED)</p> <p>Prepare 1.5 ml of peeling from PEEL-EXPERT – as indicated to the patient. Use a brush to apply the product evenly over the face. The intensity of the effect is controlled by the exposure time or the number of layers, depending on the skin preparation and the number of treatments in the course. Exposure time for the first use is 3 minutes. In following treatments, you can increase the exposure time up to 10 minutes depending on the condition of the patient's skin.</p> <p>Remove excess acids with wet sponges, then neutralize the acid remains using a cotton pad with M311 NEUTRALIZER. The neutralizer's remains should also be removed from the skin surface with wet sponges.</p>
3	<p>REVITALIZING MASK</p> <p>Apply P135 HYDRA-HELP MASK with gentle massage movements. It will instantly eliminate irritation, restore skin pH and create optimal conditions for cell regeneration. Exposure time is 10-15 min. Do not wash off the remains of the mask, just soak it with a dry napkin</p>
4	<p>SPF-PROTECTION</p> <p>At the end of the peel procedure, be sure to use H218 SUN-BLOCK EMULSION SPF50 or H210 CREAM-PROTECTOR SPF30.</p>

ENZYME ANTI-AGE CARE

ENZYME CARE WITH ANTI-AGE EFFECT

Comprehensive anti-age care to smooth wrinkles, even skin tone, and increase its elasticity. Activation of regenerative processes in the skin and synthesis of the structural components of the dermis leads to skin thickening and increasing its elasticity

Maximum duration of the 8-step procedure: 1 hour

Mandatory step of the 4-step procedure

Additional step of the 8-step procedure

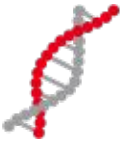

INDICATIONS:

- Type of aging with fine wrinkles
- Signs of photoaging
- Hyperpigmentation of any genesis
- Fatigue and atonicity of the skin

CONTRAINDICATIONS:

- Acne at active stage

- CLEANSING**
Clean the face and neck area with **P173 CALMING MILK**. Distribute over the skin with light massage movements. Wash off with warm water. Then use **P174 CALMING TONIC**.
- EXFOLIATION**
Apply 4 ml of **P200 SOFT-PEELNIG ENZYME MASK** in a thick layer to the face and neck area. Leave it for 7-10 minutes. To intensify the effect, cover the mask with a film and then cover with a warm wet towel or napkin. After the exposure, emulsify the mask with light massage movements and rinse thoroughly with water. Tonify the skin.
- MASSAGE**
Massage using **P102 SILVERY MESSAGE GEL**. Texture of the gel allows a massage lasting up to 40 minutes. Remove the remains with a wet napkin. Tonify the skin.
- SERUM**
Apply 2 ml of **P107 RENEWING ENZYME AHA SERUM** to the face and neck area. Leave it for 2-3 minutes until completely absorbed.
- ACTIVE MASK**
Prepare **P106 LUXE-AGE PEARLY ALGAE MASK** mix 30 g of powder and 90 ml of water to create a homogeneous mixture. Apply the mask with a spatula to the face area. Leave the mask for 15 minutes. Remove it as one piece. Then remove the remains of the mask with a wet napkin. Tonify the skin.
- BIOMIMETIC SERUM WITH TARGETED ACTION**
Apply 2 ml of **P105 LUXE-AGE GOLD-FILL SERUM** to the face and neck area. Leave it for 2-3 minutes until completely absorbed.
- EYE CARE**
Apply **P204 MATRIX EYE CREAM** to the eye area.
- FINISH CREAM**
Apply **P194 RENEW LIFTING CREAM** gently to the face and neck area.

ENZYME PEEL: EXPRESS CARE

Quick and gentle regeneration of even the most sensitive skin!
Gentle exfoliation of the stratum corneum, regeneration, and revitalization of the skin.

The care provides the immediate result and has a prolonged effect.

 Duration of the procedure: 25-30 minutes

INDICATIONS:

- Pre-peeling preparation
- Post-peeling care
- The first signs of aging
- Skin atony
- Dull skin complexion

CONTRAINDICATIONS:

- Acne at active stage

1	CLEANSING Clean the face and neck area with P172 COMFORT CLEANSING MOUSSE . Distribute over the skin with light massage movements. Wash off with warm water. Then use P174 CALMING TONIC .
2	EXFOLIATION-PEELING Apply 4 ml of P200 SOFT-PEELNIG ENZYME MASK in a thick layer to the face and neck area. Leave it for 7-10 minutes. To intensify the effect, cover the mask with a film and then cover with a warm wet towel or napkin. After the exposure, emulsify the mask with light massage movements and rinse thoroughly with water. Tonify the skin.
3	SERUM-PEELING Apply 2 ml of P107 RENEWING ENZYME AHA SERUM to the face and neck area. Leave it for 2-3 minutes until completely absorbed.
4	ACTIVE MASK Apply P135 HYDRA-HELP MASK in a thick layer to the face and neck area. Exposure time is 10 minutes. Do not wash off the mask, remove the remains with a dry napkin. Finish cream is optional.

ANTI-HAIR-LOSS TREATMENT

Professional trichological NeoThrix від Reneo Cosmetics

- the line was developed by leading European trichologists and dermatologists
- the optimal set of products for treatment and care effects
- the most effective ingredients in a unique form of delivery - the technology of long-term release

INDICATIONS:

- Alopecia (hair loss)
- Dandruff
- Oily scalp

To solve the most urgent hair and scalp care problems.

1	DIAGNOSTICS Trichoscopy
2	SCALP PEELING Apply H331 SCALP PEELING on dry scalp, along the partings. Exposure time – 2-5 minutes.
